

iPhone, iPad, and iPod Benchmarks

Welcome to the Geekbench iPhone, iPad, and iPod Benchmark Chart. The data on this chart is gathered from user-submitted [Geekbench 5](#) results from the [Geekbench Browser](#). To make sure the results accurately reflect the average performance of each device, the chart only includes iPhones, iPads, and iPods with at least five unique results in the Geekbench Browser.

[Geekbench 5](#) scores are calibrated against a baseline score of 1000 (which is the score of an Intel Core i3-8100). Higher scores are better, with double the score indicating double the performance.

If you're curious how your iPhone, iPad, or iPod compares, you can [download Geekbench 5](#) and run it on your iOS device to find out its score.

This chart was last updated less than a minute ago.
